

## **AMENDMENTS TO THE CLAIMS**

The listing of claims will replace all prior versions, and listings, of claims in the application:

### **LISTING OF CLAIMS:**

Claims 1-32 (canceled)

Claim 33 (new): A bifurcated graft configured to treat an aortic aneurysm, comprising:  
a bifurcated body including a trunk, a first leg and a second leg;  
a first ring attached to the trunk;  
a second ring and a third ring each attached to the first leg; and  
a fourth ring and a fifth ring each attached to the second leg.

Claim 34 (new): The bifurcated graft of claim 33, wherein each of the rings are self-expanding.

Claim 35 (new): The bifurcated graft of claim 33, the bifurcated graft defining an internal surface, wherein each of the rings are configured within the internal surface of the graft.

Claim 36 (new): The bifurcated graft of claim 33, the first ring further comprising at least one vessel wall engaging member.

Claim 37 (new): The bifurcated graft of claim 33, the second ring further comprising at least one vessel wall engaging member.

Claim 38 (new): The bifurcated graft of claim 33, the fourth ring further comprising at least one vessel wall engaging member.

Claim 39 (new): The bifurcated graft of claim 33, each of the rings further comprising a plurality of alternating apices.

Claim 40 (new): The bifurcated graft of claim 39, further comprising a helical coil configured at each of the plurality of alternating apices.

Claim 41 (new): The bifurcated graft of claim 33, wherein the first leg is longer than the second leg.

Claim 42 (new): The bifurcated graft of claim 33, wherein the second ring and third ring are spaced longitudinally along the first leg.

Claim 43 (new): The bifurcated graft of claim 33, wherein the fourth ring and fifth ring are spaced longitudinally along the second leg.

Claim 44 (new): The bifurcated graft of claim 33, wherein each of the rings define continuous closed structures.

Claim 45 (new): The bifurcated graft of claim 33, wherein at least the second ring and fourth ring are permanently attached to the bifurcated graft prior to placement thereof at an aortic bifurcation.
